InitiativeEU digital ID scheme for online transactions across Europe (/info/law/better-regulation/have-your-say/initiatives/12528-EU-digital-ID-scheme-for-online-transactions-across-Europe_en).

Thank you for the possibility to contribute in the eIDAS review process. TalTech Information Systems Group has researched and observed the developments of eIDAS for several years. During this period, we have focused on eIDAS implementation practices, analysis of different countries and cross-border use of the eIDAS regulation. Based on our experience and research findings, eIDAS is a valuable concept that definitely strengthens the EU digital single market. Main challenges come from different practices or interpretation. By combining option 1 and option 2, it is possible to significantly improve the current situation and make eIDAS more unambiguous and transparent. According to the provided documentation, option 3 would result into setting up a parallel scheme to the already existing eID schemes. Therefore, this option adds complexity to the eIDAS ecosystem and presumes additional funding. Therefore, we recommend to conduct a cost-benefit analysis regarding this option, in particular, because of the use of the EUid is planned to be voluntary.

Report an issue with this feedback (/info/law/better-regulation/have-your-say/initiatives/12528-EU-digital-ID-scheme-for-online-transactions-across-Europe/F548621/report_en).
